

Soul Treasure Map

Make your own map to bring you *your bliss* and deliver your desires.

Making & Loving

Your **Map**

Here are some questions for you:

What parts of your life do you want to improve? What are your goals?
How are you going to bring your “grand vision” for your purpose to life?

Not sure? No worries - and it’s a fabulous thing you’re here.
Because I’m about to give you one of my all-time favorite tools
to create clear, actionable answers to those powerful questions.

Anytime of the year is ideal to create your magical treasure map, or vision board,
that draws to you the things and experiences you want to manifest in your life going
forward.

So here's how you do it:

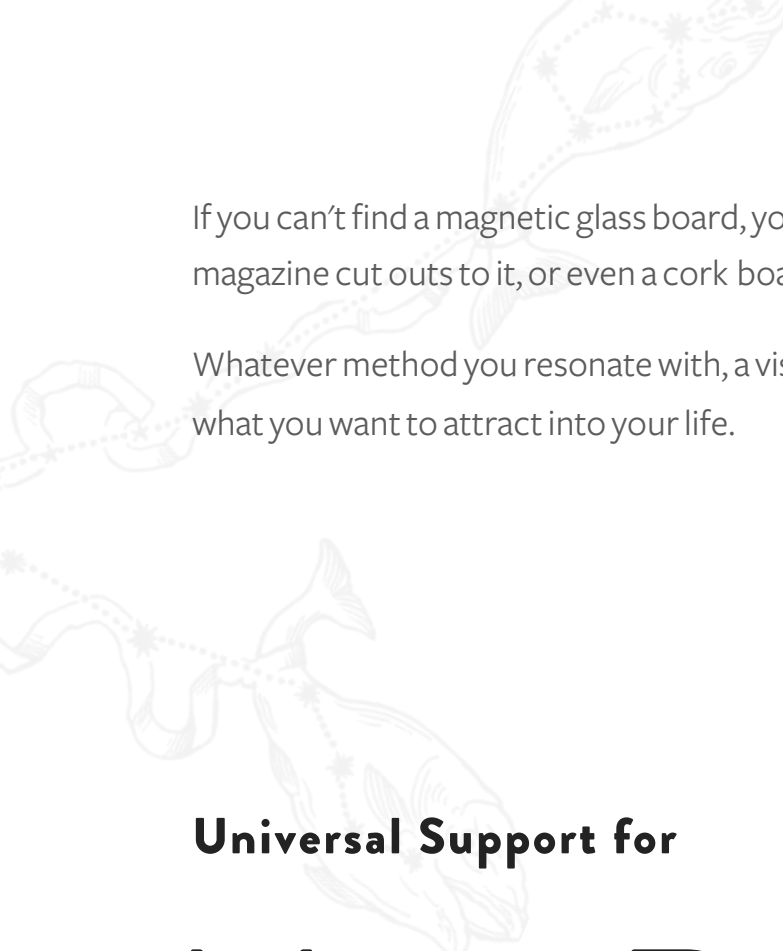

Take some time to get clear on your vision and dreams for the future. Then gather up an assortment of beautiful magazines and begin cutting out images, words and phrases of things that support those goals and make you feel empowered and good.

I like to use a magnetic glass board so I can add little magnets to the items I'll be putting on it.

I ENVISION EACH MAGNET

drawing to me what I aspire to have in my life.
Images from my own delicious treasure map,
leading me to amazing vacation spots,
workshops I've always wanted to sign up for,
places I want to visit,
and anything that inspires me to live
a more spiritually and emotionally fulfilled life.

If you can't find a magnetic glass board, you can also use poster board and glue the magazine cut outs to it, or even a cork board and tack them on.

Whatever method you resonate with, a vision board creates a visual representation of what you want to attract into your life.

Universal Support for

Your **Dreams**

Through the creative visualization process, you are, in essence, allowing the Universe to support your dreams by creating shifts that will bring you into energetic alignment with your desires and goals.

But remember: your vision board needs to be put in a location where you can see it every day. You'll be pleasantly surprised how your energy will shift and begin magically attracting new opportunities to your realm of possibilities.

It's the feelings that the images and phrases evoke that energetically charges the treasure map with your intent and creates fertile soil for the seeds of your magic to blossom.

Meditate on what you want for the year ahead and create a theme for your vision board that's personalized to reflect the type of life you want to live and who or what you want to become. Then add to it as the year goes on, energizing it with your thoughts, prayers and intention. It's a living extension of your dreams, that changes and flows with you.

Just make sure not to attach yourself to the outcome, and instead give permission to your spiritual team to bring new beginnings that may be better than you may have even imagined for yourself.

It's all about creating the space that allows real miracles and magic to happen. Give it a try and let me know how it works for you!

May your treasure map fill your life with the gifts of abundance + spiritual adventure!
